NOTICE OF SITE AND ARCHITECTURAL REVIEW PERMIT APPLICATION

Notice is hereby given that the Planning Division of the Community Development Department of the City of Campbell has received an application for an Administrative Site and Architectural Review Permit for the following project proposal:

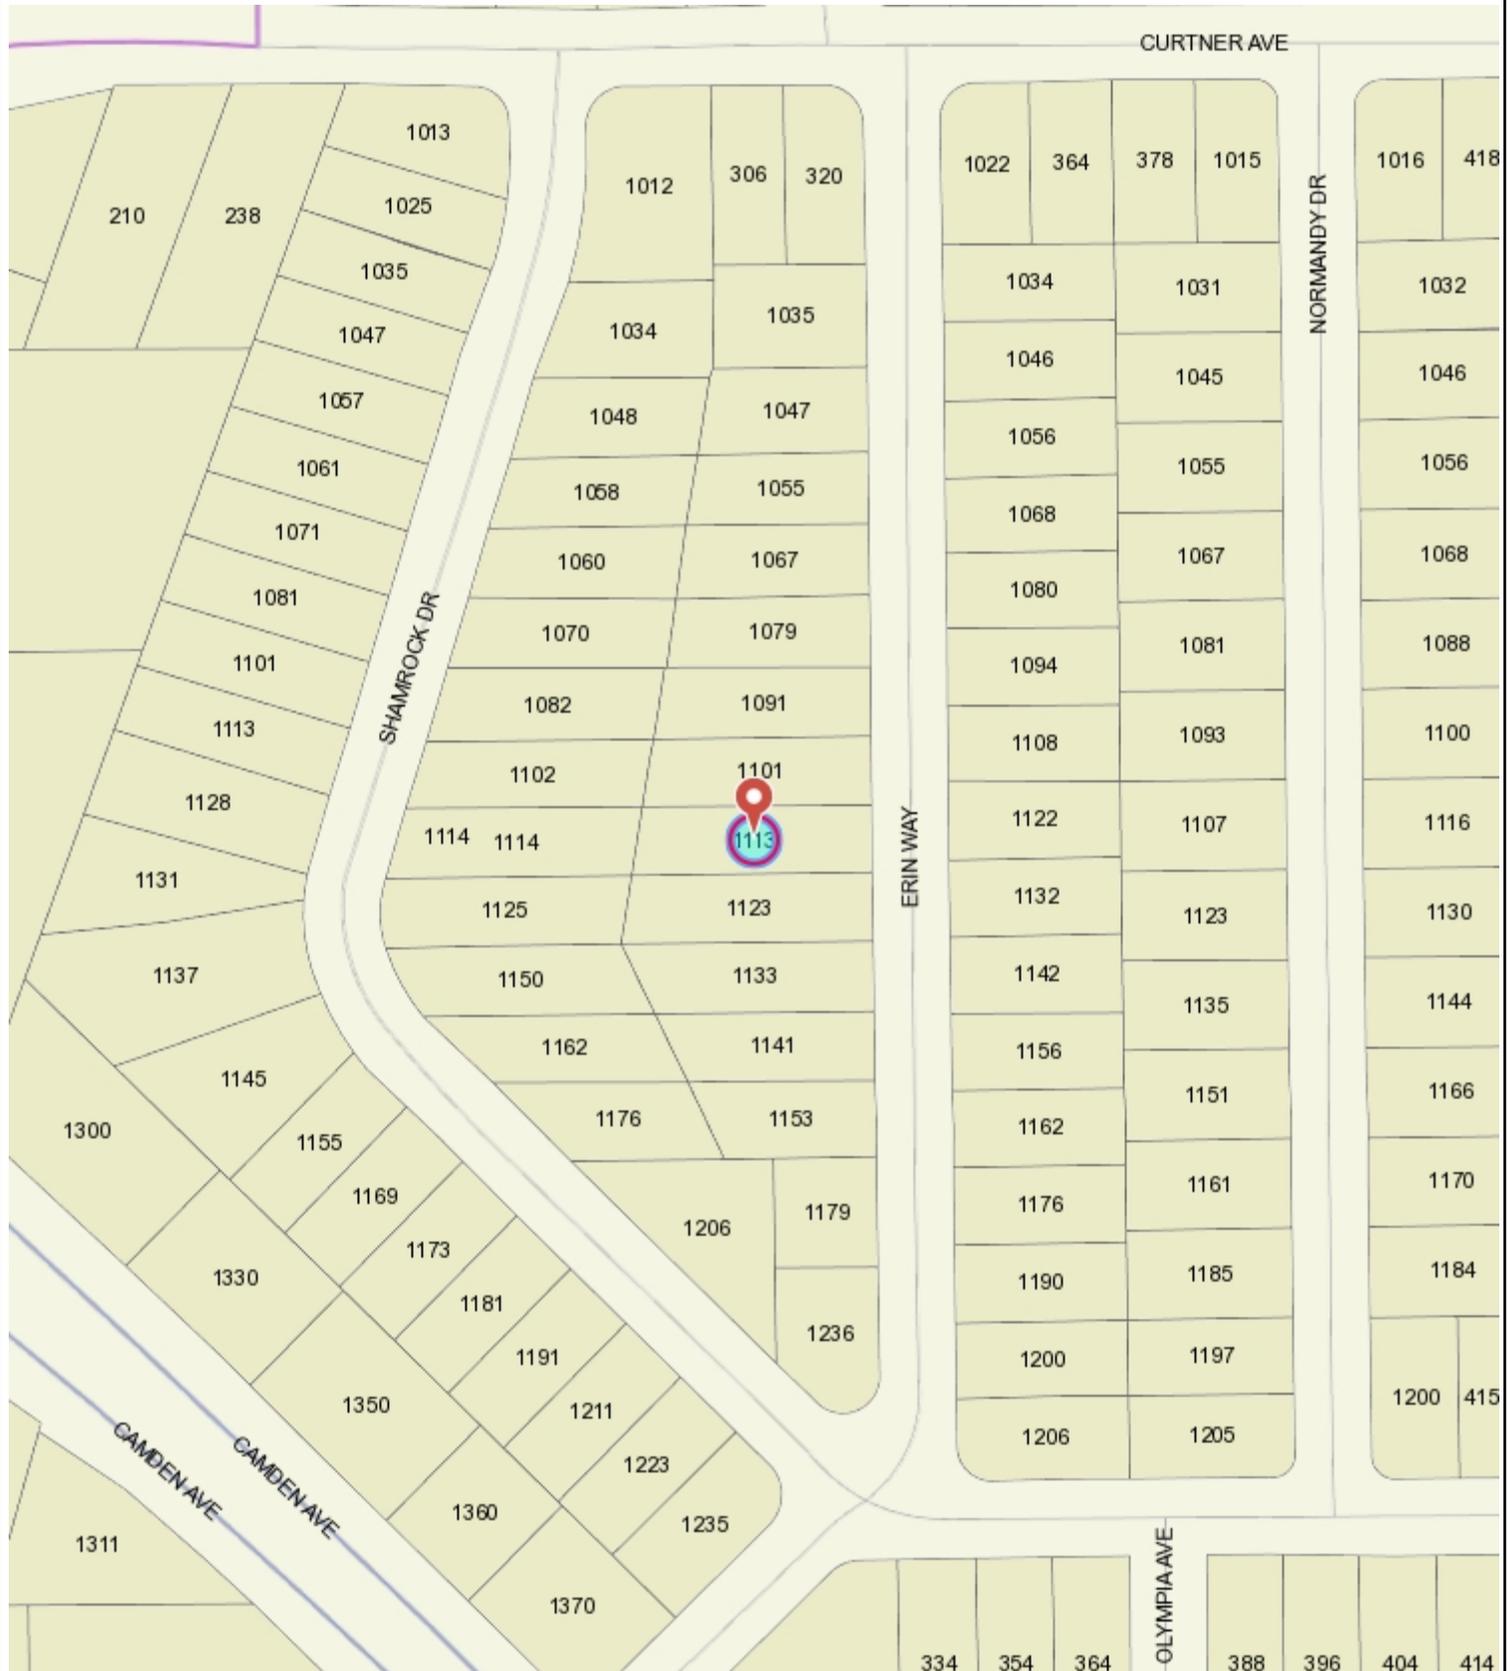

File No.:	PLN2019-230
Applicant:	Raymond Shahabi
Project Address:	1113 Erin Way
Property Owner:	Raymond Shahabi
Zoning District:	R-1-8 (Single Family Residential) Campbell Village Neighborhood Plan
General Plan:	Low Density Residential
Project Description:	Construction of a 2-story 3,020 square-foot single-family residence.

This project will be decided by the Community Development Director and you have the opportunity to provide comment prior to the Director's decision. The ten-day comment period for this application begins on March 12, 2020 and ends on March 23, 2020. Any comments regarding this application must be submitted in writing (including email) to the Planning Division before 5:00 p.m. on **March 23, 2020**. The Director will then consider all comments submitted within this time period prior to a decision. No additional notice will be provided. Please contact the project planner in a timely manner to determine what decision was reached.

Decisions by the Community Development Director are final in 10 calendar days following the date of approval, unless an appeal is received in writing at the City of Campbell Community Development Department, 70 N. First Street, Campbell, prior to the end of the appeal period. A written appeal must be accompanied with the required \$200 appeal filing fee. Plans and architectural drawings may be viewed at the Planning Division office during normal business hours (8:00 AM – 5:00 PM) and on the City's 'Public Notices' web page (<http://www.cityofcampbell.com/501/Public-Notices>) under 'Administrative Decisions'. Questions or comments regarding this application may be addressed to Daniel Fama, Senior Planner, in the Community Development Department, at (408) 866-2193 or by email danielf@campbellca.gov.

SHEETS INDEX

1. **Review of this Developmental proposal is limited to acceptability of site access, water supply and may include specific additional requirements as they pertain to fire department operations, and shall not be construed as a substitute for formal plan review to determine compliance with adopted model codes. Prior to performing any work, the applicant shall make application to, and receive from, the Building Department all applicable construction permits.**
2. **Fire Sprinklers Required:** An automatic residential fire sprinkler system shall be installed in one- and two-family dwellings when additions are made that increase the building area to more than 5,600 square feet. **Exception:** One or more additions made to a building after January 1, 2011 that do not total more than 1,000 square feet of building area. 2) In all new basements and in existing basements that are expanded by more than 50%. **NOTE:** The owner(s), occupant(s) and any contractor(s) or subcontractor(s) are responsible for consulting with the water purveyor of record in order to determine if any modification or upgrade of the existing water service is required. A State of California licensed (C-16) Fire Protection Contractor shall submit plans, calculations, a completed permit application and appropriate fees to this department for review and approval prior to beginning their work. CFC Sec. 313.2 as adopted and amended by CBLMC.
3. **Water Supply Requirements:** Potable water supplies shall be protected from contamination caused by fire protection water supplies. It is the responsibility of the applicant and any contractors and subcontractors to contact the water purveyor supplying the site of such project, and to comply with the requirements of that purveyor. Such requirements shall be incorporated into the design of any water-based fire protection systems, and/or fire suppression water supply systems or storage containers that may be physically connected in any manner to an appliance capable of causing contamination of the potable water supply of the purveyor of record. Final approval of the system(s) under consideration will not be granted by this office until compliance with the requirements of the water purveyor of record are documented by that purveyor as having been met by the applicant(s). 2010 CFC Sec. 903.3.5 and Health and Safety Code 13114.7.
4. **Address Identification:** New and existing buildings shall have approved address numbers, building numbers or approved building identification placed in a position that is plainly legible and visible from the street or road fronting the property. These numbers shall contrast with their background. Where required by the fire code official, address numbers shall be provided in additional approved locations to facilitate emergency response. Address numbers shall be Arabic numbers or alphabetical letters. Numbers shall be a minimum of 4 inches (101.6 mm) high with a minimum stroke width of 0.5 inch (12.7 mm). Where access is by means of a private road and the building cannot be viewed from the public way, a monument, pole or other sign or means shall be used to identify the structure. Address numbers shall be maintained. CFC Sec. 505.1.
5. **Construction Site Fire Safety:** All construction sites must comply with applicable provisions of the CFC Chapter 33 and our Standard Detail and Specification SI-7. Provide appropriate notations on subsequent plan submittals, as appropriate to the project. CFC Chp. 33.

FIRE SPRINKLER SYSTEM WILL BE PROVIDED

STANDARDS FOR TREE PROTECTION DURING CONSTRUCTION

Construction of private property where protected trees are designated for preservation shall be protected during development of a property by compliance with the following:

- Protective fencing shall be installed no closer to the trunk than the dripline, and far enough from the trunk to protect the integrity of the tree. Protective fencing shall be installed as follows:
 - The fence shall be a minimum of six feet in height and shall be set securely in place.
 - The fence shall be chain link without slats to allow visibility to the trunk for inspections and safety.
 - There shall be no storage of any kind prior to or at such time after the protective fencing is installed.
 - The fence may be adjusted as necessary to accommodate work approved within the dripline provided any excavation is done in accordance with instructions directed by a qualified arborist.
- The existing grade level around a tree shall normally be maintained out to the dripline of the tree. Alternate grade levels may be approved by the Community Development Director when it is reasonably demonstrated that the alternate grade will not damage the health of the tree.
- Drain walls shall be installed whenever impervious surfaces will be placed over the root system of a protected tree (the root system generally extends to the outermost edges of the branches).
- Trees that have been damaged by construction shall be repaired in accordance with accepted arboriculture methods.
- Trees cannot be pruned to accommodate grading or construction without the express written approval of the City. Upon receipt of written approval, pruning of trees must be undertaken in accordance with "Pruning Standards" of the International Society of Arboriculture and must be carried out by a licensed arborist.
- Soil compaction of the area under the dripline of the tree shall be avoided during all phases of site clearing and construction.
- No soil sterilants or weed killer that will inhibit or restrict the tree's growth may be applied in the root area.
- No signs, wires or any other object shall be attached to the tree.
- Any other measures deemed necessary by a qualified arborist and specified in any report prepared for development projects with City review and approval.
- The applicant shall provide the project planner with photos of the installed protective fencing prior to issuance of a building permit.
