

# Courtesy Notice

Dear Campbell Resident,

February 20, 2026

The City of Campbell Planning Division has received an application for a proposed project near you.

To learn more, scan the QR code below to view the project plans or contact the Project Planner listed. You will receive another notice before the City makes a decision on the project.

### PROJECT INFO

**Project Address:** 73 S 1st Street  
**Zoning | Area Plan:** P-D (H) | N/A  
**Neighborhood Association(s):** Downtown Campbell  
**Neighborhood Association**  
**Council District:** 3  
**File No.:** PLN-2026-17  
**APN(s):** 412-06-039  
**Applicant:** Kamywab Moradi, Ammirato Construction,  
**Property Owner:** Chung Chan  
**Application Type:** Historic Resource Alteration Permit

### PROJECT DESCRIPTION

To allow the restoration and in-kind repair of a single-story historic residence, including replacement of damaged wood siding, repair of the porch and stairs, installation of historically compatible window trim, re-roofing of the main house and garage, and installation of new gutters and downspouts.

### CONTACT

**Project Planner:** Daniel Fama, Senior Planner  
[daniel.f@campbellca.gov](mailto:daniel.f@campbellca.gov)  
(408) 866-2193

**No decision is being made at this time.** This notice is provided as a courtesy only. Before a decision is reached, you will receive a formal notice with another opportunity to submit public comments. For project status, contact the Project Planner.

City of Campbell, Planning Division

### SCOPE OF WORK:

RESTORE SELECT AREAS OF DAMAGED OR REMOVED WOOD SIDING. RESTORED WOOD SIDING SHALL MATCH THE EXISTING AND HISTORICAL SIDING IN APPEARANCE, REVEAL, AND INSTALLATION METHOD.

REPAIR THE PORCH AREA. NEW DECK AND STAIRS SHALL MATCH THE ORIGINAL ARCHITECTURAL STYLE AND HISTORICAL CHARACTER OF THE RESIDENCE.

REMOVE EXISTING NON-ORIGINAL WINDOW TRIMS AND INSTALL NEW WINDOW TRIMS DESIGNED TO MATCH THE ORIGINAL ARCHITECTURAL STYLE AND HISTORICAL CHARACTER OF THE RESIDENCE.

REPLACE ROOFING OF THE MAIN HOUSE AND GARAGE TO MATCH THE ORIGINAL ARCHITECTURAL STYLE AND HISTORICAL CHARACTER OF THE RESIDENCE.

INSTALL GUTTERS AND DOWNSPOUTS TO MATCH CAMPBELL CHARACTERISTICS

NO MECHANICAL, ELECTRICAL, PLUMBING, OR STRUCTURAL WORK IS PROPOSED UNDER THIS PERMIT.

#### PROJECT DESCRIPTION:

BUILDING OCCUPANCY	: R3
TYPE OF CONSTRUCTION	: V-B
ZONING	: P-D (H)
STORIES	: 1
YEAR BUILT/EFF	: 1895/1965
LOT SIZE	: 6,500 SF
AUTOMATIC FIRE-SPRINKLER	: NO
APN	: 412-06-039

#### PLANNING / HISTORICAL CONSISTENCY NOTES:

NO CHANGE TO BUILDING FOOTPRINT, HEIGHT, OR MASSING IS PROPOSED.

WORK IS LIMITED TO RESTORATION IN-KIND.

ALL MATERIALS WILL BE SELECTED TO MAINTAIN THE EXISTING HISTORICAL CHARACTER OF THE STRUCTURE.

### GENERAL NOTES:

- THE PROPOSED RESIDENCE IS TO BE CONSTRUCTED BY A CONTRACTOR AND THE ARCHITECTURAL PLANS ARE BASED ON SITE PLANS, EXTERIOR ELEVATIONS, SCALED FLOOR PLANS AND MATERIAL CONSTRUCTION SPECIFICATIONS APPROVED BY THE OWNER. THE ARCHITECTURAL PLANS ARE NOT INTENDED TO BE COMPREHENSIVE AND IT SHALL BE THE RESPONSIBILITY OF THE SUBCONTRACTORS TO NOTIFY THE CONTRACTOR OF ANY NECESSARY CLARIFICATIONS OR MODIFICATIONS.
- ALL WORK CONNECTED WITH THIS PROJECT SHALL BE DONE IN A PROFESSIONAL MANNER IN ACCORDANCE WITH THE TRADITIONALLY AND LEGALLY DEFINED "BEST ACCEPTED PRACTICE" OF THE TRADE INVOLVED. ADDITIONALLY, ALL WORK SHALL COMPLY WITH APPLICABLE CODES AND TRADE STANDARDS WHICH GOVERN EACH PHASE OF WORK, INCLUDING BUT NOT LIMITED TO ALL APPLICABLE LOCAL CODES AND/OR LEGISLATION.
- THE CONTRACTOR SHALL BE RESPONSIBLE FOR NOTIFYING THE DESIGNER OF ANY UNUSUAL OR UNFORESEEN FOUNDATION CONDITIONS, DISCREPANCIES OF OMISSIONS WITHIN THE PLANS OR ANY DEVIATIONS OR CHANGES FROM THE PLANS BEFORE PROCEEDING WITH THE WORK INVOLVED OTHERWISE THEY WILL BE CONSIDERED ADEQUATE FOR PROPER COMPLETION OF THE PROJECT. THE CONTRACTOR SHALL BE RESPONSIBLE FOR VERIFYING FIELD MEASUREMENTS BEFORE ORDERING MATERIALS AND PREFABRICATED ITEMS.
- ADEQUATE SUPERVISION AND PERIODIC INSPECTION DURING THE CONSTRUCTION PHASE ARE RECOMMENDED. THE CONTRACTOR SHALL BE RESPONSIBLE TO ENSURE THAT THIS INSPECTION AND SUPERVISION AREA PROVIDED BY QUALIFIED PERSONS.
- THESE PLANS SHALL NOT BE CONSIDERED COMPLETE AND READY FOR CONSTRUCTION UNTIL A BUILDING PERMIT HAS BEEN ISSUED.
- IN ALL CASES WRITTEN DIMENSIONS TAKE PRECEDENCE OVER SCALED DIMENSIONS. DIMENSIONS ARE TO THE FACE OF STUD OR FACE OF CONCRETE UNLESS OTHERWISE NOTED.
- LARGER SCALE DETAILS TAKE PRECEDENCE OVER SMALLER SCALE DETAILS.
- LAY OUT ALL STRUCTURAL WORK BY REFERRING TO DIMENSIONS AND ELEVATION NOTES ON THE ARCHITECTURAL PLANS. DO NOT SCALE STRUCTURAL DRAWINGS WORK DETAIL DIMENSIONS FROM CONTROLLING SURFACE POINTS AND ACTUAL MATERIAL DIMENSIONS.
- SLOPE FINISH EXTERIOR SURFACE AWAY FROM FOUNDATION.

#### NOTE:

THE FOLLOWING CODES AND REGULATIONS AS AMENDED BY THE STATE OF CALIFORNIA & LOCAL JURISDICTION ARE APPLICABLE TO THIS PROJECT.

CBC	2025	CALIFORNIA BUILDING CODE
CRC	2025	CALIFORNIA RESIDENTIAL CODE
		CALIFORNIA ENERGY EFFICIENCY STANDARDS

# Construction Best Management Practices (BMPs)

Construction projects are required to implement year-round stormwater BMPs.

## Materials, Waste, and Sediment Management

### Construction Entrances and Perimeter

- Establish and maintain effective perimeter controls, and stabilize all construction entrances and exits to sufficiently control erosion, sediment discharges and tracking of sediment offsite.
- Sweep or vacuum immediately any tracking of sediment offsite and secure sediment source to prevent further tracking. Never hose down streets or sidewalks.

### Non-Hazardous Materials and Dust Control

- Berm and cover stockpiles of sand, dirt or other construction material with tarps when rain is forecast or when they are not in use. Weigh down and secure tarps for wind protection.
- Keep materials off the ground (e.g., store bagged materials on wood pallets, store loose materials on tarps not pavement, etc.).
- Use captured water from other activities (e.g., testing fire lines) for dust control.
- Ensure dust control water doesn't leave site or discharge to storm drains. Only use enough to control dust. Contain and dispose of excess water properly.

### Hazardous Materials

- Label all hazardous materials and hazardous wastes (such as pesticides, paints, thinners, solvents, fuel, oil, and antifreeze) in accordance with City, County, State and Federal regulations.
- Store hazardous materials and wastes in watertight containers, store in appropriate secondary containment, and cover them at the end of every workday, during wet weather or when rain is forecast.
- Follow manufacturer's application instructions for hazardous materials and do not use more than necessary. Do not apply chemicals outdoors when rain is forecast within 24 hours.
- Arrange for appropriate disposal of all hazardous wastes. Have all pertinent Safety Data Sheets (i.e., SDS/MSDS/PSDS) onsite.

### Waste Management

- Inform trash-hauling contractors that you will accept only watertight dumpsters for onsite use. Repair/replace any dumpster that is not watertight or leaking.
- Cover and maintain dumpsters. Check frequently for leaks. Place dumpsters under roofs or cover with tarps or plastic sheeting secured around the outside of the dumpster. If the dumpster leaks, place a plastic liner underneath the dumpster to collect leaks. Never clean out a dumpster by hosing it down on the construction site – clean with dry methods, clean offsite or replace dumpster.
- Place portable toilets and hand wash stations away from storm drains. Make sure they are equipped with containment pans (secondary containment) and are in good working order. Check frequently for leaks.
- Dispose of all wastes and demolition debris properly per SDS and applicable regulations. Recycle or compost materials and wastes as feasible and appropriate, including solvents, water-based paints, vehicle fluids, broken asphalt and concrete, wood, and cleared vegetation.
- Dispose of liquid residues from paints, thinners, solvents, glues, and cleaning fluids as hazardous waste per SDS.
- Keep site free of litter (e.g., lunch items, water bottles, cigarette butts and plastic packaging).
- Prevent litter from uncovered loads by covering loads that are being transported to and from site.

## Equipment Management & Spill Control

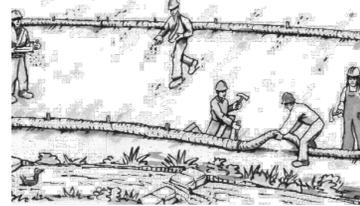

### Vehicle and Equipment Maintenance

- Designate an area of the construction site equipped with appropriate BMPs, well away from creeks or storm drain inlets, for auto and equipment parking and storage.
- Perform major maintenance, repair jobs, and vehicle/equipment washing offsite.
- If refueling or vehicle maintenance must be done onsite, work in a bermed area away from storm drains and over a drip pan or drop cloths big enough to collect fluids. Recycle or dispose of fluids as hazardous waste.
- If vehicle or equipment cleaning must be done onsite, clean with water only in a bermed area that will not allow rinse water to run into gutters, streets, storm drains, or creeks.
- Do not clean vehicles or equipment onsite using soaps, solvents, degreasers, or steam cleaning equipment, and do not use diesel oil to lubricate equipment or parts onsite.

### Spill Prevention and Control

- Always keep spill cleanup materials (e.g., rags, absorbents, and cat litter) available at the construction site.
- Maintain all vehicles and heavy equipment. Inspect frequently for leaks. Use drip pans to catch leaks until repairs are made.
- Clean up leaks, drips and other spills immediately using dry cleanup methods whenever possible (absorbent materials, cat litter and/or rags) and dispose of cleanup materials properly.
- Sweep up spilled dry materials immediately. Never attempt to "wash them away" with water or bury them.
- Clean up spills on dirt areas by digging up and properly disposing of contaminated soil.
- Report significant spills to the appropriate local spill response agencies immediately. If the spill poses a significant hazard to human health and safety, property or the environment, report it to the State Office of Emergency Services at (800) 852-7550 (24 hours).

## Earthmoving

### Grading and Earthwork

- Schedule grading and excavation work during dry weather.
- Prevent sediment from migrating offsite and protect storm drain inlets, drainage courses and creeks by installing and maintaining appropriate BMPs tailored to the site's specific characteristics and conditions. Examples of such BMPs may include silt fences, gravel bags, fiber rolls, temporary swales, compost socks, etc. Ensure that BMPs are installed in accordance with manufacturer's specifications and properly maintained throughout the duration of construction activities.
- Stabilize all denuded areas and install and maintain temporary erosion controls (such as erosion control fabric or bonded fiber matrix) until vegetation is established.
- Remove existing vegetation only when necessary. Plant temporary vegetation to prevent erosion on slopes or in areas where construction is not immediately planned.
- Keep excavated soil and/or transfer it to dump trucks, onsite, not in the streets. Ensure all subcontractors working onsite are implementing appropriate BMPs.

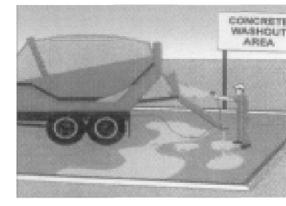

### Contaminated Soils

- If any of the following conditions are observed, test for contamination and contact the [Regional Water Quality Control Board](#) and the local agency: 1) Unusual soil conditions, discoloration, or odor. 2) Abandoned underground tanks. 3) Abandoned wells. 4) Buried barrels, debris, or trash.
- If the above conditions are observed, document any signs of potential contamination, clearly mark areas and fence/tape them off so they are not disturbed by construction activities.

### Landscaping

- Protect stockpiled landscaping materials from wind and rain by storing them under tarps year-round.
- Stack bagged material on pallets and under cover.
- Discontinue application of any erodible landscape material within 2 days before a forecast rain event or during wet weather.
- Store materials onsite, not in the street.

## Concrete Management & Dewatering

### Concrete Management

- Store both dry and wet concrete-related materials under cover, protected from rainfall and runoff and away from storm drains or creeks. Store materials off the ground on pallets. Protect dry materials from wind.
- Avoid pouring concrete in wet weather or when rainfall is imminent to prevent concrete that has not cured from contacting stormwater runoff.
- Wash out concrete equipment/mixers/trucks offsite, or onsite only in designated washout containers/areas where the water will flow into a temporary lined waste pit and in a manner that will prevent leaching into the underlying soils. (See CASQA Construction Stormwater BMP Handbook for temporary concrete washout facility details).
- Do not wash sweepings from exposed aggregate concrete into the street or storm drain. Collect and return sweepings to aggregate base stockpile or dispose properly.
- Make sure that construction waste (e.g., concrete, stucco, cement wastewater, or residual materials) is collected, removed, and disposed of only at authorized disposal areas. Do not dispose of construction waste in storm drains, ditches, streets, creeks, dirt areas, or the sanitary sewer.

### Dewatering

- Discharges of groundwater or captured runoff from dewatering operations must be properly managed and disposed. When possible, send dewatering discharge to landscaped area or sanitary sewer. If discharging to the sanitary sewer, obtain permission from the local wastewater treatment plant.
- Divert water originating from offsite away from all onsite disturbed areas.
- When dewatering, notify and obtain approval from the local municipality before discharging water to a street gutter or storm drain. Filtration or diversion through a basin, tank, or sediment trap may be required.
- In areas of known or suspected contamination, call the local agency to determine whether the groundwater must be tested. Pumped groundwater may need to be collected and hauled offsite for treatment and proper disposal.
- For additional information, refer to the CASQA's Sheet NS-2 "Dewatering Operations."

## Paving/Asphalt Work

### Paving

- Avoid paving and seal coating in wet weather or when rain is forecast to prevent materials that have not cured from contacting with stormwater runoff.
- Cover storm drain inlets and manholes when applying seal coat, slurry seal, fog seal, or similar materials.
- When construction is complete, remove all covers from storm drain inlets and manholes.
- Collect and recycle or properly dispose of excess abrasive gravel or sand. Do NOT sweep or wash it into gutters, storm drains, streets, dirt areas, or the sanitary sewer.

### Sawcutting & Asphalt/Concrete Removal

- Protect storm drain inlets during saw cutting.
- When making saw cuts, use as little water as possible.
- Residue from saw cutting, coring and grinding operations shall be picked up by means of a vacuum device.
- Shovel, absorb, or vacuum saw cut slurry deposits and dispose of all waste properly and as soon as reasonably possible. Sawcutting residue should not be left on pavement surface.
- If saw cut slurry enters a storm drain inlet, clean it up immediately and notify the local municipality.

## Copper Architectural Features

Discharges to storm drains generated by installing, cleaning, treating or washing copper architectural features, is a violation of the municipal stormwater ordinance and may be subject to a fine. These BMPs must be implemented to prevent prohibited discharges to storm drains:

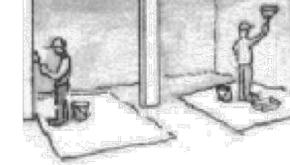

### During Installation

- If possible, purchase copper materials that have been pre-patinated at the factory.
- If patination done on site, implement one or more of the following BMPs:
  - Discharge the rinse water to landscaping. Ensure that the rinse water does not flow to the street or storm drain. Block off storm drain inlet if needed.
  - Collect rinse water in a tank and pump to the sanitary sewer. Contact your local sanitary sewer agency before discharging to the sanitary sewer.
  - Collect the rinse water in a tank and haul off-site for proper disposal.
- Consider coating the copper materials with an impervious coating that prevents further corrosion and runoff. This will also maintain the desired color for a longer time, requiring less maintenance.

### During Maintenance

- Block storm drain inlets as needed to prevent runoff from entering storm drains.
- Discharge the wash water to landscaping or to the sanitary sewer (with permission from the local sanitary sewer agency). If this is not an option, haul the wash water off-site for proper disposal.

## Painting & Paint Removal

### Painting Cleanup and Removal

- Never clean brushes or rinse paintcontainers to landscaping, dirt areas or into a street, gutter, storm drain, or creek.
- For water-based paints, paint out brushes to the extent possible, and then rinse into a drain connected to the sanitary sewer. Never pour paint down a storm drain inlet.
- For oil-based paints, paint out brushes to the extent possible, and then clean with thinner or solvent in a proper container. Filter and reuse thinners and solvents. Dispose of excess liquids as hazardous waste.
- Sweep up or collect paint chips and dust generated from non-hazardous dry stripping and sand blasting into plastic drop cloths and dispose of as trash.
- Chemical paint stripping residue and chips and dust from marine paints or paints containing lead, mercury, or tributyltin must be disposed of as hazardous waste. Lead-based paint removal requires a state-certified contractor.

**Storm drain polluters may be liable for fines of up to \$10,000 per day!**

Please read carefully. These are legally binding statements that may warrant consultation with legal counsel and/or a translator prior to signing. Misrepresentation is grounds for revocation of an approved land use entitlement pursuant to Campbell Municipal Code (CMC) 21.68.030.B. Signature by the Applicant and Property Owner (or a duly authorized individual who may sign on behalf of a corporation, non-profit organization, limited liability company, joint partnership, homeowner associations, etc.) constitutes acknowledgment and/or acceptance of the following by all parties:

- (1) The Project Site *is not* included on the Hazardous Wastes and Substances Sites List pursuant to Government Code § 65962.5;
- (2) A political donation(s) of \$250 or more to any City of Campbell Planning Commissioner *has not* been made pursuant to the Political Reform Act;
- (3) A vested right to a land use entitlement or building permit *will not* be conferred without additional approval by the West Valley Sanitation District;
- (4) On behalf and with the permission of the design professional(s) and engineer(s) associated with the project, the City of Campbell is granted release to copy and reproduce electronically and/or physically, in whole or in part, drawings and all other submitted materials (including site plans, architectural and design plans and drawings, and massing diagrams) and the undersigned parties waive any limitations provided in Government Code § 65103.5, for the City's regulatory, administrative, and legal functions, including sharing of information with other governmental entities and for compliance with the California Public Records Act (CPRA), and specifically agree to allow the City to provide such documents to the public in response to any CPRA request.
- (5) As specified by CMC Sec. 21.38.040.C, if an application is deemed incomplete revised Application Materials must be submitted within one hundred eighty calendar days after notification of incompleteness, or the application shall be deemed withdrawn *without refund of application fees*;
- (6) All notices and communications may be provided electronically via the MGO system. This acknowledgement also constitutes an intelligent, voluntary, and knowing waiver to receive a physical copy of any notice required or implied to be required by the Permit Streamlining Act;
- (7) An application for a development permit is not deemed submitted for the purposes of the Permit Streamlining Act until all required materials have been received and all fees have been paid;
- (8) For the purposes of the Telecommunications Act 47 U.S.C. §332(c)(7), Government Code § 65964.1, the Permit Streamlining Act, and any applicable Federal Communications Commission orders or regulations, an application for a development permit is not deemed submitted, and therefore any applicable shot clocks will not be deemed triggered, until all required materials have been received and all fees have been paid;
- (9) A project shall not be construed as operative, vested, or final nor shall City permits be considered valid, until the filing fees for a Notice of Determination (NOD) have been paid (Fish & Game Code §711.4(c)(3)); and
- (10) The information submitted with the development application is true and correct to the best of my knowledge.

CITY OF CAMPBELL  
Community Development Department

**Housing Crisis Act (SB330/SB 8) Compliance Form**

The Housing Crisis Act of 2019 (SB 330 [Chapter 654, Statutes of 2019] and SB 8 [Chapter 161, Statutes of 2021]) sets a temporary 10-year prohibition on reducing residential density when associated with the approval of a "housing development project", beginning January 1, 2020 and concluding on January 1, 2030. A "housing development project" is defined as: a residential project of one or more units; a mixed-use project with two-thirds of the floor area designated for residential use; or a transitional or supportive housing project. In addition, existing units that are defined as "protected"<sup>1</sup> under the law (see below for qualifications) must be replaced with units that have an equivalent number of bedrooms, rents affordable at the same income category as the displaced tenant(s) (or if incomes are unknown, according to the proportion of lower income renter households in the jurisdiction), and displaced tenants must be provided relocation benefits. Therefore, concurrent with the application of a housing development project that involves the demolition of any residential unit(s), the property owner shall answer the questions below for Housing Crisis Act compliance.

**Site Address:** 73 S 1st Street, Campbell, CA, 95008 **Legal Description:** TRACT/BLOCK: 506502/3 - APN: 412-06-039

1) **Are you proposing to redevelop the site with a "housing development project"?** \_\_\_ Yes  No  
If no, stop here and sign certification.

2) **Units proposed for demolition:** \_\_\_ **Units proposed for construction:** \_\_\_  
If a reduction in the number of units is proposed, a demolition permit cannot be issued.

- 3) **If you answer yes to any of the following questions, the unit(s) are considered "protected":**
- a. Currently, or within the last 5 years, are any of the units subject to a recorded covenant ordinance, or law restricting rents to levels affordable to low- or very low-income households? \_\_\_ Yes \_\_\_ No
  - b. Currently, or within the last 5 years, are any of the units occupied by low- or very-low income households (see attachment for current income limits)? \_\_\_ Yes \_\_\_ No

If any of the units proposed for demolition meet the "protected" criteria, please provide a summary of units (i.e., apartment number, size, number of bedrooms, household size, and income level of tenant) and schedule a meeting with a planner to discuss replacement requirements. A demolition permit cannot be issued until an agreement is executed with the City guaranteeing the replacement of the protected units and tenant relocation benefits.

**Property Owner Certification (required):**

I CHUNG CHAN, hereby certify that I am the property owner of the above described property. I declare under the penalty of perjury, the facts, statements and information presented in this document are true and correct to the best of my knowledge and belief.
