

## TAX RATE STATEMENT

An election will be held in the City of Campbell (the "City") on November 6, 2018, to authorize the sale of up to \$50 million in bonds of the City to finance the specific projects listed in the bond measure. If such bonds are authorized, the City expects to sell the bonds in one or more series. Principal and interest on the bonds will be payable solely from the proceeds of ad valorem tax levies made upon the taxable property in the City. The following information is provided in compliance with sections 9400-9404 of the California Elections Code. Such information is based upon the best estimates and projections presently available from official sources, upon experience within the City, and other demonstrable factors.

Based upon the foregoing and projections of the City's assessed valuation:

1. The best estimate of the average annual tax rate that would be required to be levied to fund the bond issue over the entire duration of the bond debt service, based on a projection of assessed valuations available at the time of filing of this statement is \$0.019 per \$100 (or \$19 per \$100,000) of assessed valuation of all property to be taxed. The best estimate of the final fiscal year in which the tax is anticipated to be collected is 2050-51.

2. The best estimate of the highest tax rate that would be required to be levied to fund the bond issue, based on a projection of assessed valuations available at the time of filing this statement is \$0.0273 per \$100 (or \$27.33 per \$100,000) of assessed valuation of all property to be taxed. The best estimate of the first fiscal year in which the highest tax rate will apply is 2022-23.

3. The best estimate of the total debt service, including the principal and interest, that would be required to be repaid if all the bonds are issued and sold is \$90,500,000.

Voters should note that such estimated tax rates are specific to the repayment of bonds issued under this authorization and are and will be in addition to tax rates levied in connection with other bond authorizations approved or to be approved by the City or any other overlapping public agency.

Voters should note that estimated tax rate is based on the ASSESSED VALUE of taxable property on Santa Clara County's official tax rolls, not on the property's market value. In addition, taxpayers eligible for a property tax exemption, such as the homeowner's exemption, will be taxed at a lower effective tax rate than described above. Property owners should consult their own property tax bills to determine their property's assessed value and any applicable tax exemptions.

Attention of all voters is directed to the fact that the foregoing information is based upon projections and estimates only, which amounts are not maximum amounts or durations and are not binding upon the City. The actual debt service amounts, tax rates and the years in which they will apply may vary from those presently estimated, due to variations from these estimates in the timing of bond sales, the amount of bonds sold

and market interest rates at the time of each sale, and actual assessed valuations over the term of repayment of the bonds. The dates of sale and the amount of bonds sold at any given time will be determined by the City based on need for funds and other factors. The actual interest rates at which the bonds will be sold will depend on the bond market at the time of each sale. Actual future assessed valuation will depend upon the amount and value of taxable property within the City as determined by the Santa Clara County assessor in the annual assessment and the equalization process.
